

02-661F Series From 70nH to 170nH

CHARACTERISTICS

Description: SMD Trans-inductor Voltage Regulator Inductors

Applications: Data centers, Graphic Cards, CPU

Operating Temperature: -40°C to +125°C (including self-temperature rise)

Storage Temperature: -40°C to +125°C (on board)

Inductance Test Frequency: 100kHz/1.0V

Irms(A): Heat rated current will cause the coil temperature rise approx. ΔT of 40°C.

Isat 1(A): Saturation current will cause inductance L0 to drop approx. 20% at +25°C.

Isat 2(A): Saturation current will cause inductance L0 to drop approx. 20% at +100°C.

Isat 3(A): Saturation current will cause inductance L0 to drop approx. 20% at +125°C.

Rated Current: The lower value of Isat and Irms.

Storage Condition (Component in its packaging)

- Temperature: Less than 40°C
- Humidity: Less than 60% RH

Miscellaneous:

- All test data referenced to 25°C ambient
- RoHS Compliant

Samples available. See website for ordering information.
